C	Controllable Pitch
F	Fixed
N/A	Not Available
Z	Z-Drive

SECTION III. CUTTER CHARACTERISTICS

NOTES

- 1) The endurance of a cutter to operate without provisioning is highly dependent upon several variables which change based on mission conditions. Coast Guard cutters are not designed to specific endurance but rather to a set of performance requirements. The performance requirements are utilized to determine such parameters as maximum and cruising speeds, fuel capacity, water capacity, stores capacity, armament, crew size, and special mission characteristics (ice breaking, buoy handling, towing, etc.). The original performance requirements assume a specific set of operating conditions such as most economical speed. Actual endurance will vary depending on mission demands. Endurance is listed in days. Fuel with 10% reserve, water, and provisions at economical speed.
- 2) Hull 800 has a max range of 2100 and a range at max spd of 1380. Hull 801 has a max range of 2120 and a range at max spd of 1380.
- 3) Hull 102 is augmented by 120' ATON barge #12001. Hull 103 is augmented by 120' ATON barge #12002. Bow thruster installed in ATON barges.
- 4) Hull 315 has a construction barge.
- 5) Hull 75407 has a shaft hp of 750 and a boom capacity of 1.5. Hull 75409 has a max range of 3310.
- 6) Hull 65503 has a shaft hp of 660. Hulls 65504 and 65505 have a shaft hp of 580. Hull 65506 has a shaft hp of 600.
- 7) Hull 65400 has an ATON barge.
- 8) WPC-179s (ZEPHYR, TORNADO, SHAMAL) returned to the Navy on 30 September 2011.
- 9) All 8 WPB-123 platforms were decommissioned on 12/03/08 and removed from this list. These cutters are "out of commission" and in caretaker status at CG Yard in Baltimore, MD.
- 10) All WPB-87s have entered the fleet as of September 2009.
- 11) USCGC WAESCHE commissioned May 2010.
- 12) USCGC ACUSHNET decommissioned 11 March 2011.
- 13) USCGC HAMILTON decommissioned 28 March 2011.
- 14) USCGC CHASE decommissioned 29 March 2011.
- 15) USCGC DALLAS decommissioned 30 March 2012.
- 16) USCGC STRATTON commissioned 31 March 2012.

SECTION III. CUTTER CHARACTERISTICS

17) USCGC BERNARD C. WEBBER (WPC-154) commissioned 14 April 2012.
